Python 3 Text Processing with NLTK 3 Cookbook

Python 3 Text Processing with NLTK 3 Cookbook Over 80 practical recipes on natural language processing techniques using Python's NLTK 30 Jacob Perkins

Contents

Python is an interpreted language, which means you just type in plain text to an interpreter, and things happen There is no compilation step, as in languages such as C or FORTRAN To start up the Python interpreter, just type python from the command line on a terminal You'll get a prompt, and can start typing in python commands

Thinking in Python - linuxtone

Thinking in Python is, initially, a translation of Thinking in Patterns with Java, rather than an introduction to Python (there are already plenty of fine introductions to that superb language) I find this prospect to be much more exciting than the idea of struggling through another language tutorial (my apologies to those who were hoping
