Whether Algebra 1 or Algebra 2 is harder depends on the student. For example, the shock of dealing with variables for the first time can make Algebra 1 very hard until you get used to it. On the other hand, Algebra 2 is often considered harder because of its advanced concepts such as logarithms and imaginary numbers.

Trigonometry (from Greek trigōnon, "triangle" and metron, "measure") is a branch of mathematics that studies relationships between side lengths and angles of triangles. The field emerged in the Hellenistic world during the 3rd century BC from applications of geometry to astronomical studies. The Greeks focused on the calculation of chords, while mathematicians in India created the earliest ...
